

## Questions for Tender DS-23-01 Supply and Delivery of 2024 Subaru Crosstrek

1. I understand the Regional District is wanting All Terrain Tires for the Crosstrek, are they also wanting to keep the stock set of M+S rated all season tires that the Crosstrek comes with from the factory or do they only want one set of tires to come with the Crosstrek?

A: The Regional District is ok with the factory stock M+S rated tires that comes stock, however, would prefer a studded winter rated tire on rims in addition.

2. Under Block Heater it states “ Cold Climate Package-List” In the Tender it doesn’t state what additional items are required for the Cold Climate Package, other than a Block Heater. Where is it listed?

A: The only requirement that the Regional District needs for a cold climate package would be a block heater. If there are additional items offered in a cold climate package, the Regional District asks that they can be listed, however, not required.

3. Under “Coverings” it states “(See additional items)” and I don’t see a list in the tender listing the additional coverings required.

A: “Coverings” reference floor mats and additional covering for trunk space if available – please omit “(See additional items)” .
