The Contractor will forthwith remove at their own expense liens, filed or registered against the Landfill and Facility properties and the Contractor will indemnify and save harmless the Regional District from liability arising out of any such claims of lien.

27. **MONIES DUE TO THE REGIONAL DISTRICT**

All monies payable to the Regional District by the Contractor under any stipulation herein or as provided in Article 13, Regional District's Right To Correct Deficiencies or Article 28, Liquidated Damages may be retained by the Manager out of any monies due, or which may become due, from the Regional District to the Contractor under this or any other contract with the Regional District, or the Manager may demand payment to the Regional District by the Contractor, or the Manager may deduct monies from the Irrevocable Letter of Credit. The Manager shall have full authority to withhold any estimate, if circumstances arise which may indicate the advisability of so doing, though the final sum to be retained may be unascertained.

The Manager may also, at their discretion, calculate into the monies due to the Regional District the Manager's time, other Regional District staff time, plus a 10% overhead in any event where the Regional District has had to correct deficiencies as per Article 13, Regional District's Right To Correct Deficiencies.

28. **LIQUIDATED DAMAGES**

The Regional District may deduct and retain the amounts of such liquidated damages as per Article 27, Monies Due to the Regional District.

In case of the Contractor's failure to conduct the Work properly and fully, and as required, or in case of the Work or any part thereof, being taken out of the Contractor's hands, as provided in these Conditions, the Manager may invoke the use of the Irrevocable Commercial Letter of Credit and/or may proceed to undertake the work for the Contractor, as the Contractor's agent in this respect, or proceed to invoke liquidated damages set out herein.

29. **FUEL SURCHARGE**

A Fuel Surcharge Rate Adjustment Scale will be implemented. The following table demonstrates the applicable fuel surcharge rate that can be applied to the tendered unit price each month for the **hauling portion only**. The reference index will be Natural Resources Canada's Petroleum Product Prices publication for diesel prices in Prince George which can be viewed at <http://www.nrcan.gc.ca/energy/sources/petroleum-crude-prices/1508>. The applicable fuel surcharge will be determined monthly and the month's applicable fuel surcharge rate will be based on the fuel index price for the first day of the month for Prince George. **The price of \$1.876 per litre for diesel (as of Sept 22, 2023) will be used as a starting point for Contract ES-23-20** For example, if the index reports a price of \$1.725 on September 1, the fuel surcharge payable for the tendered unit price for the month of September will be decreased by 1.00%. If on

September 1, the price is reported at \$2.125, then the Fuel Surcharge for the tendered unit price in September will be increased by 2.00%.

38. **OWNERSHIP AND FREEDOM OF INFORMATION**

the condition constituting Force Majeure. Where, as a result of Force Majeure, there is a material increase in the Contractor's cost of or the time required for the performance of the Services that is not offset by a decrease in cost, then the Regional District shall increase the amount of the service fee payable to the Contractor under Article 22 of this Agreement, as may be agreed by the Contractor, or as determined under Article 33 of the Contract. If the event of Force Majeure results in a material increase in the cost of the work to be performed in respect of which the Contractor is providing the Services, then the Regional District may choose not to proceed with the completion of the work and may terminate this Agreement. If the Regional District terminates this Agreement following the termination of the Force Majeure event, then it shall compensate the Contractor in accordance with Article 10 of this Agreement.

A GUIDE TO ACCIDENT INVESTIGATION

In order to ensure a safe workplace, the Regional District will investigate accidents (including near misses), exposures, injuries, and occupational diseases.

An **accident** is an unexpected event or series of events that cause or have potential to cause physical harm to a worker. An accident occurs at a specific date and time. An accident may result in zero, one or many injured workers.

An **exposure** is the subjection to harmful conditions that, over a period of time, have the potential to result in abnormal health conditions, injury, or occupational disease. An exposure has an event start date and time and ends at an end date and time. An exposure may result in zero, one or many injured workers.

- The Regional District will investigate an accident or exposure when it resulted in injury requiring medical treatment or had a potential for causing serious injury.
- An incident should be investigated as soon as possible after the occurrence.
- The incident should be investigated as soon as possible after the occurrence.
- The incident should be investigated by 2 people, one of whom should be familiar with the work process being carried out at the time of the incident. If feasible, include the participation of one worker representative and one employer representative.
- The purpose of investigation is to determine cause (or causes) so corrective action(s) can be taken to prevent recurrence.

PURPOSE OF AN ACCIDENT INVESTIGATION

An accident investigation should answer the questions: WHO, WHERE, WHEN, WHAT, WHY and HOW.

<i>This form collects information that answers:</i>	WHO Employer, injured worker other person(s) involved	WHERE Location of incident	WHEN Date and time of incident						
<i>Your description of the accident will answer:</i>	WHAT	<p>Before the accident</p> <ul style="list-style-type: none"> ◆ What happened before the accident? ◆ What were the events that led up to the accident? ◆ What was the worker doing immediately prior to the accident? <p>At the time of the accident</p> <ul style="list-style-type: none"> ◆ What happened at the time of the accident? ◆ What was the worker doing at the time of the accident? ◆ What was the last event before the worker got injured? <p>After the accident</p> <ul style="list-style-type: none"> ◆ What happened after the accident? ◆ Who were involved? ◆ What treatment, if any, was given to the injured worker? <p>Other information</p> <ul style="list-style-type: none"> ◆ Other observations ◆ Other related information 							
<i>Accident cause(s) and contributing factor(s)</i>	WHY	From the "What", you should be able to identify the hazard(s) that the worker was exposed to and thus why the accident occurred.							
<i>Preventative action(s) section will answer:</i>	HOW	<p>Once you know "Why" an accident occurred, you can now determine "How" to prevent recurrence. For example:</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 50%;">- Action to improve maintenance program</td> <td style="width: 50%;">- Establish or revise safe job procedures</td> </tr> <tr> <td>- Equipment/building repair or replacement</td> <td>- Installation of guard or safety device</td> </tr> <tr> <td>- Establish closer supervision</td> <td>- Training/retrain person(s)</td> </tr> </table>		- Action to improve maintenance program	- Establish or revise safe job procedures	- Equipment/building repair or replacement	- Installation of guard or safety device	- Establish closer supervision	- Training/retrain person(s)
- Action to improve maintenance program	- Establish or revise safe job procedures								
- Equipment/building repair or replacement	- Installation of guard or safety device								
- Establish closer supervision	- Training/retrain person(s)								

PURPOSE OF AN ACCIDENT INVESTIGATION

To determine the most probable cause and contributing factors, consider details of the investigation and, where possible, the worker's statement. Determine if the accident was due to an ACT of an individual, a CONDITION of the working environment, or a PERSONAL FACTOR inherent in an individual at the time of the accident.

Unsafe Act – A specific action or lack of action by an individual which would be considered UNDER THE INDIVIDUAL'S CONTROL. Generally, violation of safety rules or disregard of a hazard would be considered unsafe acts unless specific criteria indicate a personal factor to be in the cause. Examples:
 Abuse of equipment, willful misconduct
 Jumping from elevations
 Not following established rules
 Backing up with no guide

Personal Factor – where there is evidence of a deficiency in ability, physical conditions or mental attitude; and UNCONTROLLABLE FACTOR inherent in an individual at the time of the accident. Examples:
 Work fatigue due to manual exertion
 Influence of emotional problems
 Illness or allergy
 Influence of alcohol or drugs suspected

Unsafe Environment or Condition – A situation or event NOT CONTROLLABLE BY THE INDIVIDUAL (a condition causing an allergic reaction to some but not most workers should be considered personal factor and not an unsafe condition). Inadequate training or instruction should be considered a condition as opposed to a deficiency in skill or ability. Examples of Unsafe environment or condition:
 Poor housekeeping, congested area
 Failure of equipment, tool
 Personal protective equipment not available
 Poor visibility (eg – foggy)
 Poor weather conditions
 Pressurized material
 Object lacks suitable handles
 Orientation training lacking or inadequate

Improper Procedure – Examples:
 Inadequate inspection
 Not locked out
 Failure to report unsafe conditions
 Failure to get help
 Work standard not available or inadequate
 Safety program evaluation lacking
 Improper use of equipment or tool
